

ClearCase® Remote Client (CCRC) Fundamentals

WINDOWS ■ BASE CLEARCASE ■ REMOTE CLIENT

ID: CCRC-BASE-FUN

Overview

This one-day, hands-on course covers IBM® Rational® ClearCase Remote Client for users at remote sites connecting to a Base ClearCase installation. For software developers, we recommend this course followed by the one-day *ClearCase Remote Client Intermediate* course.

Prerequisites

- Basic knowledge of Windows interfaces
- Familiarity with Windows Explorer
- No previous ClearCase experience

Objectives

At the end of this course, students will understand ClearCase concepts and will be able to use ClearCase Remote Client to accomplish basic configuration management tasks.

Outline

Introduction	CCRC terms and concepts
Create View	Connect to server, create view, load resources
Load Rules	Selecting data from a VOB to load into a view
View-private Files	Creating user-private files in the workspace
Checkout Basics	Checking out, checking in, and undoing checkout
Hijack	Working offline with hijack
Search	Finding checked-out, view-private, and hijacked files
Version Tree	Examining versions with the Version Tree display
Add to Source Control	Adding new files to a directory
View Update	Updating views, directories, and files
Loaded But Missing	Working with checked out, removed, and renamed files
Rename, Move, and Delete	Changing the directory structure in a VOB
