

# ClearCase® Intermediate

UNIX ■ BASE CLEARCASE ■ DYNAMIC VIEWS

ID: CC-INT-LIN-DYN-BASE

## Overview

Recommended follow-on to the *ClearCase Fundamentals* course for software developers. This one-day, hands-on course covers parallel development aspects of the tool required for most software development efforts.

## Prerequisites

- *ClearCase Fundamentals* course or equivalent ClearCase experience

## Objectives

At the end of this course, students will understand the parallel development aspects of ClearCase and will be able to use ClearCase tools and procedures to accomplish typical software development configuration management tasks.

## Outline

Non-Selected Versions	Display/download a version outside the view
Diff Tool	Diff element versions
Merge Basics	Merge tool basics
Merge Files	Merging file element versions
Unreserved Checkouts	Unreserved checkouts, working in parallel on single branch
Label Basics	Create, apply, and lock labels in base ClearCase
Config Spec Basics	Basic config spec rules for version selection in base ClearCase
Auto-branch Rules	Automatic branching with config specs in base ClearCase
Batch Merge	Using the merge manager for batch merges in base ClearCase
Review	Daily life cycle UCM exercise
Directory Merge	Merging directories and handling conflicts
View Extended Names	Alternate access to view data in the Unix environment
Find	Basic syntax and usage for find command
Find Queries	Element, branch, and version queries for the find command
