

# Rational Team Concert™ Builds

DESKTOP BUILDS ■ RTC VERSION 5.0.1

ID: RTC-BUILD-DSK-501

## Overview

This half-day, hands-on class covers submitting desktop builds, configuring build agents, and creating build definitions.

## Audience

- Build or project leads responsible for designing and maintaining software builds.

## Prerequisites

Island Training's *RTC Source Control Basics* class or equivalent knowledge.

## Objectives

At the end of this course, students will understand how to implement the Rational Team Concert build system for Eclipse and Visual Studio Builds. They will be able to use the build system for builds and deployments.

## Available Build Modules

Request Builds	Request personal and stream builds
Build Agents	Run and register build agents
Basic Build Definition	Configure and run Command Line builds
Builds and Releases	Automatic snapshots and release associations for builds
Ant Builds	Configure and run Ant builds
Visual Studio® Builds	Configure and run .NET builds
ClearCase® Connector	Configure the ClearCase connector for stream synchronization

*Contact us to choose appropriate modules for your workgroup from our library of over 1000 modules.*
