

# Build Forge Advanced

WINDOWS

ID: BF-ADV-WIN

## Overview

This one-day, hands-on course covers security/permissions, database management, integration to CM tools, scheduling jobs, and advanced process capabilities.

## Prerequisites

- Island's *Build Forge Intermediate* course

## Objectives

At the end of this course, students will be able to extend their Build Forge projects to manage a complex environment.

## Outline

Access Groups	Controlling access to Build Forge projects and objects
Permissions	Setting security and permissions in Build Forge
Classes	Adding a class, editing a class, changing the default class from the Execute page
Collectors	Creating collectors for server manifests
Dot run/wait Commands	Chaining projects with the .run and .runwait commands
Dot Commands	Using dot commands to add special functions to steps
Timeout	Specifying how long the system should wait for the current command to produce output
Adaptors	Basic introduction to adaptors, their interfaces, and their uses
ClearCase Adaptor	Using the ClearCase Adaptor
ClearQuest Adaptor	Using the ClearQuest Adaptor
md5	Snapshots and md5 values for tracking files
Registers	Using Build Forge registers
Semaphores	Setting and using Build Forge semaphores
Schedules	Scheduling jobs with the Build Forge Scheduler
