# Clearmake for Software Architects

---

## Overview

Hands-on Clearmake training for software architects. This half-day course covers makefile considerations when using Clearmake and provides a deeper understanding of how Clearmake builds Derived Objects.

## Prerequisites

*Clearmake for Software Developers* and makefile architect experience.

## Objectives

At the end of this course, students will be able to construct makefiles compatible with Clearmake.

## Outline

Sibling DOs	Make practice for sibling Derived Objects
Incremental targets	Make practice for incremental targets
Common problems	Identify and solve common Clearmake problems
Compatibility modes	Advanced compatibility mode features
Distributed builds	Distributed build controls
Pre-promotion techniques	Pre-promoting Derived Objects
DO management	Technique for managing and versioning Derived Objects
Development techniques	Techniques for practical audited builds of large software systems
