
Clearmake for Software Developers

Overview

Hands-on Clearmake training for software developers. Topics for this half-day course include:

- Creating Clearmake Derived Objects and
- Reading and interpreting information in Derived Objects.

Prerequisites

ClearCase Fundamentals for Unix course or equivalent ClearCase experience. No previous Clearmake experience required.

Objectives

At the end of this course, students will understand Clearmake Derived Objects and be able to use DO information to debug and verify builds.

Outline

Derived Object intro	Understand and identify Derived Objects
Config record hierarchy	Config record hierarchy, data, and reports
Clearmake	Config record generation, compatibility modes, options
Build avoidance	Avoiding unnecessary builds
Wink-in	Build output sharing
